

Adapt·A·Door

by 

ADAPTS TO ALMOST ANY RETROFIT OR REPLACEMENT!

The versatile Adapt-A-Door puts an end to problems with replacement or retrofitting doors for walk-ins and refrigerated warehouses. Choose from three varieties that make it easy to replace a worn-out or ill-fitting door in any walk-in or warehouse. Or use the Bally Adapt-A-Door for the easiest way to install a new door where you need it.

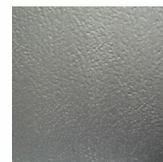

- The same super-insulating poured-foam urethane that protects every Bally panel is foamed into the Adapt-A-Door.
- The door is supported by heavy-duty, spring-loaded hinges and comes with a durable latch assembly.
- You can even cut this outstanding door into an ordinary masonry wall. In most replacement situations, the Adapt-A-Door is better than the original equipment!
- The Adapt-A-Door will swing freely and seal tightly for years.

Finishes

Stainless Steel

Stucco embossed Galvalume

Stucco embossed Aluminum

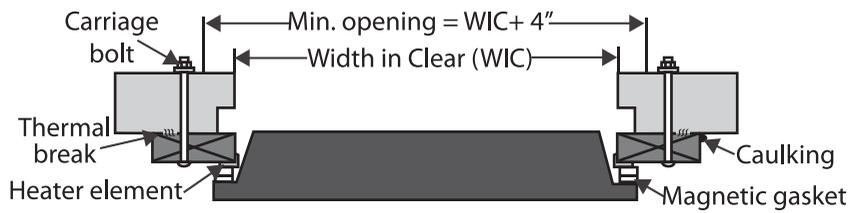

Stucco embossed White Galvanized Steel

No matter what the application,
Bally's Adapt-A-Door fits and it's easy to install!

- Anti-condensate heaters.
- Poured-in-place, non-ozone depleting, urethane foam insulation.
- Durable, positive magnetic gasket seal.
- Heavy-duty hinges and latch assemblies.
- Door closers standard on doors up to 42" wide.
- Right or left-hand swing.
- Mounting kit.
- Options Including: Diamond tread kickplates, Observation windows, Locking bars, and Trim.

Three types to fit your specific needs!

1 Cooler door with 3-sided frame.

Loop heaters are located in the frame. Use with new construction, or for retrofit and replacement on any Less Floor cooler.

2 Freezer door with 3-sided frame.

Same as #1, but with additional heater and gasket supplied at bottom of door. Use for replacement or retrofit on any Less Floor freezer.

3 Cooler/Freezer door with 4-sided frame.

Heat and gasketing around perimeter of the door frame. Use for applications with raised insulated floor- new, retrofit or replacement.
